**Ecological Feminist Philosophies** Verso Books

Heroic mothers defending home and hearth against a nature deformed by multinationalist corporate practice: this may be a compelling story, but it is not necessarily the source of valid feminist or ecological critique. What's missing is the democratic element, an insistence on bringing to public debate all the relations of gender and nature that such a view takes for granted. This book aims to situate a commitment to theory and

politics -- that is, to democratic practice -- at the center of ecofeminism and, thus, to move toward an ecofeminism that is truly both feminist and ecological. The Good-Natured Feminist inaugurates a sustained conversation between ecofeminism and recent writings in feminist postmodernism and radical democracy. Starting with the assumption that ecofeminism is a body of democratic theory, the book tells how the movement originated in debates about "nature" in North American radical feminisms, how it then became entangled with identity politics, and how it now seeks to include nature in democratic conversation and, especially, to politicize relations between gender and nature in both theoretical and activist milieus.

## **RADICAL ECOLOGY**

Rowman & Littlefield

This book presents MacKinnon's powerful analysis of politics, sexuality, and the law from the perspective of women. Using the debate over Marxism and feminism as a point of departure, MacKinnon develops a theory of gender centered on sexual subordination and applies it to the state.

## **HOW THE WOMEN'S MOVEMENT CAN SAVE THE PLANET**

Zed Books Ltd.

The historical exclusion of women's voices has diminished academic disciplines, including philosophy. In this groundbreaking new account of Western

philosophy throughout the past 2,600 years, Karen J. Warren has paired sixteen women philosophers along-side their historical male contemporaries in conversations on philosophy. An overview essay, together with chapter introductions, primary readings, and expert commentaries, offer a rich description and evaluation of each philosopher's vital contributions to Western philosophy. Book jacket.

### **MOVING BEYOND THE 'GREEN ECONOMY'**

Indiana University Press

Here feminist philosophers and ecofeminist scholars pursue the connections between feminism and environmentalism. Topics include the ecofeminist ethic; the role of patriarchal concepts in perpetuating the domination of women and nature; the grassroots origins and character of a thoughtful ecofeminism; the "ecofeminism-deep ecology debate" in environmental philosophy; deep ecological treatment of animal rights and the omission of ecofeminist analyses of the domination of animals, abortion, and nuclear deterrence;

and ways ecofeminism and the science of ecology are or could be engaged in complementary, supportive projects. The contributors are Carol J. Adams, Carol H. Cantrell, Jim Cheney, Chris Cuomo, Deane Curtin, Victoria Davion, Roger J. H. King, Stephanie Lahar, Patricia Jagentowicz Mills, Patrick D. Murphy, Val Plumwood, Catherine Roach, Robert Sessions, Deborah Slicer, and Karen J. Warren. *Ecofeminist Literary Criticism* Routledge Offers a survey of eco-feminism from a purely philosophical point of view. Representing a plurality of opinions, it demonstrates that man's domination of both women and the environment are inextricably linked.

[Bringing Peace Home](#) EcofeminismWomen, Culture, Nature

Why is ecofeminism still needed to address the environmental emergencies and challenges of our times? Ecofeminism has a chequered history in terms of its popularity and its perceived value in conceptualizing the relationship between gender and nature as well as feeding forms of activism that aim to confront the environmental challenges of the moment. This book provides a much-needed

comprehensive overview of the relevance and value of using eco-feminist theories. It gives a broad coverage of traditional and emerging eco-feminist theories and explores, across a range of chapters, their various contributions and uniquely spans various strands of ecofeminist thinking. The origins of influential eco-feminist theories are discussed including key themes and some of its leading figures (contributors include Erika Cudworth, Greta Gaard, Trish Glazebrook and Niamh Moore), and outlines its influence on how scholars might come to a more generative understanding of the natural environment. The book examines eco-feminism's potential contribution for advancing current discussions and research on the relationships between the humans and more than humans that share our world. This timely volume makes a distinctive scholarly contribution and is a valuable resource for students and academics in the fields of environmentalism, political ecology, sustainability and nature resource management.

[Ecological Feminist Philosophies](#) University of Illinois Press

This anthology situates the cultural and

literary theories of ecofeminism in an interdisciplinary and global dialogue. It brings ecofeminism into conversation with several areas of inquiry, including ecocriticism, postcolonialism, geography, environmental law, religion, geoengineering, systems thinking, family therapy, and environmental justice.

**The Voice of the Earth** Rowman & Littlefield

Leading feminist scholars and activists as well as new voices introduce and explore themes central to contemporary ecofeminism. *Ecofeminism: Feminist Intersections with Other Animals and the Earth* first offers an historical, grounding overview that situates ecofeminist theory and activism and provides a timeline for important publications and events. This is followed by contributions from leading theorists and activists on how our emotions and embodiment can and must inform our relationships with the more than human world. In the final section, the contributors explore the complexities of appreciating difference and the possibilities of living less violently. Throughout the book, the authors engage with intersections of gender and gender

non-conformity, race, sexuality, disability, and species. The result is a new up-to-date resource for students and teachers of animal studies, environmental studies, feminist/gender studies, and practical ethics.

**Ecological Feminism as Environmental Ethics** John Wiley & Sons

**Ecofeminism** HarperCollins

Two of the most important political movements of the late twentieth century are those of environmentalism and feminism. In this book, Val Plumwood argues that feminist theory has an important opportunity to make a major contribution to the debates in political ecology and environmental philosophy. *Feminism and the Mastery of Nature* explains the relation between ecofeminism, or ecological feminism, and other feminist theories including radical green theories such as deep ecology. Val Plumwood provides a philosophically informed account of the relation of women and nature, and shows how relating male domination to the domination of nature is

important and yet remains a dilemma for women.

**Feminism or Death** Elsevier

This edited volume critically engages with ecofeminist scholarship. It tracks the ongoing dialogue between women's issues and environmental change by republishing the work of pioneering scholars and activists in the field. Together with new essays by contemporary ecofeminist scholars, the book uncovers the dialectical relationship between environmental and feminist causes, the relational identities of feminists and ecofeminists, and the concept of ecofeminism as a rallying point for environmental feminism. The volume defines ecofeminism as a multidisciplinary project and will appeal to readers working within the field of Environmental Humanities.

**CONTEMPORARY DEBATES ON ECOFEMINISM(S)**

Open Road Media

This is a new edition of the classic examination of major philosophical, ethical, scientific and economic roots of environmental problems which examines the ways that radical ecologists can

transform science and society in order to sustain life on this planet. It features a new Introduction from the author, a thorough updating of chapters, and two entirely new chapters on recent Global Movements and Globalization and the Environment.

### **The Search for a Livable World**

Springer

"This collection of works is ambitious, well documented, thoroughly—though not turgidly—referenced, and comprehensively indexed. It is deeply disturbing and deeply engaging..."

—Australian Feminist Studies Contributors discuss the subtle and complex relationships between various notions of "feminism" and "peace." Feminist peace issues are explored along a wide spectrum of personal and political issues—from the personal violations of rape, incest, and domestic abuse, to the violence of racism, sexism, economic exploitation, war, and genocide.

### **Ecological Feminism**

Routledge  
Examining the development of ecofeminism from the 1980s antimilitarist movement to an internationalist ecofeminism in the 1990s, Sturgeon

explores the ecofeminist notions of gender, race, and nature. She moves from detailed historical investigations of important manifestations of US ecofeminism to a broad analysis of international environmental politics.

### **The Ethics and Aesthetics of Eco-caring**

Routledge  
"... thoughtful critiques of the myriad issues between women and science." -- Belles Lettres "Outstanding collection of essays that raise the fundamental questions of gender in what we have been taught are objective sciences." -- WATERwheel "... all of the articles are well written, informative, and convincing. Admirable editorial work makes this anthology unusually helpful for scholars and students... Highly recommended..." -- Choice  
Questioning the objectivity of scientific inquiry, this volume addresses the scope of gender bias in science. The contributors examine the ways in which science is affected by and reinforces sexist biases. The essays reveal science to be a cultural institution, structured by the political, social, and economic values of the culture within which it is practiced.

## **PRACTISING FEMINIST POLITICAL ECOLOGIES**

U of Minnesota Press

What is the bond between the human psyche and the living planet that nurtured us, and all of life, into existence? What is the link between our own mental health and the health of the greater biosphere? In this "bold, ambitious, philosophical essay" (Publishers Weekly), historian and cultural critic Roszak explores the relationships between psychology, ecology, and new scientific insights into systems in nature. Drawing on our understanding of the evolutionary, self-organizing universe, Roszak illuminates our rootedness in the greater web of life and explores the relationship between our own sanity and the larger-than-human world. The Voice of the Earth seeks to bridge the centuries-old split between the psychological and the ecological with a paradigm which sees the needs of the planet and the needs of the person as a continuum. The Earth's cry for rescue from the punishing weight of the industrial system we have created is our own cry for a scale and quality of life that will free us to become whole and healthy.

This second edition contains a new afterword by the author.

Rowman & Littlefield Publishers

Feminist scholars and activists explore the relationships among humans, animals, and the natural environment.

Ecofeminism in Dialogue Routledge

Ecofeminism is sometimes stereotyped by its critics as a radical woman-is-closer-to-nature-movement, or as a feel-good care alternative to utility focused and abstract environmentalism and ethics. This study challenges these views of ecofeminism and discusses a vast variety of ecofeminist standpoints concerning important issues within environmental ethics at large, such as views and values of nature, social constructivism and nature, and ethical contextualism and pluralism. Ecofeminist ethics holds that a main cause of the environmental crisis is the existence of the so-called twin domination. According to the twin domination thesis, exploitation of nature and oppression of women share the same conceptual and evaluative structure. Consequently, in order to solve the environmental crisis we need to end oppression of women, and vice versa. Acknowledge that one obvious advantage

of ecofeminism is that it puts gender issues on the environmental and development agenda, this study asks whether the fact that ecofeminism takes the twin domination these as a starting point, results in particular and from nonfeminist environmental ethics different environmental ethical theoretical standpoints.

### **Feminism and the Mastery of Nature**

Indiana University Press

A seminal work of the eco-feminist movement, connecting patriarchal society's mistreatment of women with its disregard for the Earth's ecological well-being *Woman and Nature* draws from a vast and enthralling array of literary, scientific, and philosophical texts in order to explore the relationship between the denigration of women and the disregard for the Earth. In this singular work of love, passion, rage, and beauty, Susan Griffin ingeniously blends history, feminist philosophy, and environmental concerns, employing her acclaimed poetic sensibilities to question the mores of Western society. Griffin touches upon subjects as diverse as witch hunts, strip mining, Freudian psychology, and the

suppression of sexuality to decry a long-standing history of misogyny and environmental abuse. A sometimes aggravating, often inspiring, and always insightful literary collage, this remarkable volume offers sanity, poetry, intelligence, and illumination.

The Good-natured Feminist Red

Wheel/Weiser

*Feminism and Ecological Communities* presents a bold and passionate rethinking of the ecofeminist movement. It is one of the first books to acknowledge the importance of postmodern feminist arguments against ecofeminism whilst persuasively presenting a strong new case for ecological feminism. Chris J. Cuomo first traces the emergence of ecofeminism from the ecological and feminist movements before clearly discussing the weaknesses of some ecofeminist positions. Exploring the dualisms of nature/culture and masculing/feminine that are the bulwark of many contemporary ecofeminist positions and questioning traditional traditional feminist analyses of gender and caring, *Feminism and Ecological Communities* asks whether women are essentially closer

to nature than men and how we ought to link the oppression of women, people of colour, and other subjugated groups to the degradation of nature. Chris J. Cuomo addresses these key issues by drawing on recent work in feminist ethics as well as the work of diverse figures such as

Aristotle, John Dewey, Donna Haraway and Maria Lugones. A fascinating feature of the book is the use of the metaphor of the cyborg to highlight the fluidity of the nature/culture distinction and how this can enrich ecofeminist ethics and politics. An outstanding new argument for an

ecological feminism that links both theory and practice, *Feminism and Ecological Communities* bravely redraws the ecofeminist map. It will be essential reading for all those interested in gender studies, environmental studies and philosophy.
