The Performance of Social Systems

Beacon Press (MA)
A major breakthrough
in understanding
human capability,
intelligence, &
development theory is

reported with the
results of
Cason/Jaques'
conclusive 3-year
validation study
capping Jaques' 38-
year developmental
program. Evidence
shows that individuals
mature within
predictable patterns &
that maturation
continues throughout
life. First uncovered by
Dr. Jaques in 1956, this

theory has been continually tested & confirmed since that time. Study validates the authors' dynamic conception about the maturation of capability beyond adolescence & includes discussion relating it to Piaget's concepts, which end at age 15, & to IQ studies which posit that intelligence fully matures by age 18. Cason/Jaques' research & field work demonstrate with high reliability & validity that when heavily engrossed in work, individuals process information in four & only four ways which recur in a series of higher orders of information complexity. Further, this hierarchy of mental processing methods corresponds with levels of individual

capability & gives an objective method of DIRECT OBSERVATION of capability. The ability to plot & predict the growth of human potential capability is experienced by some as controversial. Social consequences of this work are substantial & are addressed by the authors. Order from: Cason Hall, 5201 Leesburg Pike, Suite 1103, Falls Church, VA 22041; 800-448-7357.

CHANGING ON THE JOB

John Wiley & Sons
An exploration of the question of greatness from the chief classical music critic of The New York Times Anthony Tommasini has devoted particular attention to living composers and overlooked repertory. But, as with all

classical music lovers, the canon has remained central for him. Tommasini resists the neat laws of canon formation—and yet, he can't help but admit that these exalted composers have guided him through his life, resonating with his deepest emotions and profoundly shaping how he sees the world. Now, in *The Indispensable Composers*, Tommasini offers his own personal guide to what the mercurial concept of greatness really means in classical music. As he argues for his particular pantheon of indispensable composers, Tommasini provides a masterclass in what to listen for and how to understand what music does to us. *Binding, Transport and Storage of Metal Ions in*

BESTSELLER • The acclaimed social psychologist challenges conventional thinking about morality, politics, and religion in a way that speaks to conservatives and liberals alike—a “landmark contribution to humanity’s understanding of itself” (The New York Times Book Review). Drawing on his twenty-five years of groundbreaking research on moral psychology, Jonathan Haidt shows how moral judgments arise not from reason but from gut feelings. He shows why liberals, conservatives, and libertarians have such different intuitions

about right and wrong, and he shows why each side is actually right about many of its central concerns. In this subtle yet accessible book, Haidt gives you the key to understanding the miracle of human cooperation, as well as the curse of our eternal divisions and conflicts. If you're ready to trade in anger for understanding, read *The Righteous Mind. 9 Levels of Value Systems* Wiley-Blackwell

As technology erodes the impact of time and distance, more and more people live and work across cultures. This book equips readers with the tools to embrace the richness and beauty brought by cultural diversity, and ultimately engage with

the key skills for thriving in today's fast-paced, highly interconnected and interdependent world.

Metal ions play key roles in biology. Many are essential for catalysis, for electron transfer and for the fixation, sensing, and metabolism of gases. Others compete with those essential metal ions or have toxic or pharmacological effects. This book is structured around the periodic table and focuses on the control of metal ions in cells. It addresses the molecular aspects of binding, transport and storage that ensure balanced levels of the essential elements. Organisms have also developed mechanisms to deal with the non-

essential metal ions. However, through new uses and manufacturing processes, organisms are increasingly exposed to changing levels of both essential and non-essential ions in new chemical forms. They may not have developed defenses against some of these forms (such as nanoparticles). Many diseases such as cancer, diabetes and neurodegeneration are associated with metal ion imbalance. There may be a deficiency of the essential metals, overload of either essential or non-essential metals or perturbation of the overall natural balance. This book is the first to comprehensively survey the molecular nature of the overall natural balance of

metal ions in nutrition, toxicology and pharmacology. It is written as an introduction to research for students and researchers in academia and industry and begins with a chapter by Professor R J P Williams FRS.

Over the next decade,

today's connected

world will be

explosively more

connected. Anything

that can be distributed will be distributed: workforces, organizations, supply webs, and more. The tired practices of centralized organizations will become brittle in a future where authority is radically decentralized. Rigid hierarchies will give way to liquid structures. Most leaders—and most organizations—aren't ready for this future. Are you? It's too late to catch up, but it's a great time to leapfrog. Noted futurist Bob Johansen goes beyond skills and competencies to propose five new leadership literacies—combination of disciplines, practices, and worldviews—that will be needed to thrive in

a VUCA world of increasing volatility, uncertainty, complexity, and ambiguity. This book shows how to (1) forecast likely futures so you can “look back” and make sure you're prepared now for the changes to come, (2) use low-risk gaming spaces to work through your concerns about the future and hone your leadership skills, (3) lead shape-shifting organizations where you can't just tell people what to do, (4) be a dynamic presence even when you're not there in person, and (5) keep your personal energy high and transmit that energy throughout your organization. This visionary book provides a vivid description of the ideal talent profile for future

leaders. It is written for current, rising star, and aspiring leaders; talent scouts searching for leaders; and executive coaches seeking a fresh view of how leaders will need to prepare. To get ready for this future, we will all need new leadership literacies.

Human Capability

Harvard Business Press

In his classic book, *The Five Dysfunctions of a Team*, Patrick Lencioni laid out a groundbreaking approach for tackling the perilous group behaviors that destroy teamwork. Here he turns his focus to the individual, revealing the three indispensable virtues of an ideal team player. In *The Ideal Team Player*, Lencioni tells the story of Jeff Shanley, a leader desperate to

save his uncle's company by restoring its cultural commitment to teamwork. Jeff must crack the code on the virtues that real team players possess, and then build a culture of hiring and development around those virtues. Beyond the fable, Lencioni presents a practical framework and actionable tools for identifying, hiring, and developing ideal team players. Whether you're a leader trying to create a culture around teamwork, a staffing professional looking to hire real team players, or a team player wanting to improve yourself, this book will prove to be as useful as it is compelling.

Prepare to encounter your mind in a radically new way as Ken Wilber introduces Integral Mindfulness, a meditative approach based on Integral Theory and Practice. This leading-edge technique combines, for the first time in history, the ancient paths of meditation and mindfulness—or Waking Up—with modern research into psychological development and human evolution—Growing Up—resulting in a complete and powerfully effective method of personal transformation. Integral Meditation focuses attention on the inner "maps" we use to navigate life—in relationships, at work and study, in play, in just about everything

we do. Mindfulness is used to unearth these unconscious maps, then uproot them so that we can substitute happier and healthier perspectives. With experiential exercises, guided meditation instructions, and tools to identify the individual's own greatest potential, this book points the way to realizing our Supreme Identity—and to finding the reason why each of us has come into being: to embody and express in the world our unique perspective of Spirit.

"A clarion call for seeing the world as a whole," this philosophical bestseller takes readers through history, from the Big Bang through the 21st century—now featuring

an afterword with the writer-director of the Matrix franchise (San Francisco Chronicle) Join one of the greatest contemporary philosophers on a breathtaking tour of time and the Cosmos—from the Big Bang right up to the eve of the twenty-first century. This accessible and entertaining summary of Ken Wilber’s great ideas has been expanding minds now for two decades, providing a unified field theory of the universe. Along the way, Wilber talks on a host of issues related to that universe, from gender roles, to multiculturalism, environmentalism, and even the meaning of the Internet. This special anniversary edition contains an

afterword, a dialogue between the author and Lana Wachowski—the award-winning writer-director of the Matrix film trilogy—in which we’re offered an intimate glimpse into the evolution of Ken’s thinking and where he stands today. A Brief History of Everything may well be the best introduction to the thought of this man who has been called the “Einstein of Consciousness” (John White).

A simple introduction to Spiral Dynamics Integral (SDi), based on the work of Professor Clare Graves. SDi shows that human nature is not fixed. It evolves. The way people think depends on their life conditions,

as we can see from watching children's thinking develop as they grow up. And we have the in-built capacity to think in new more complex ways when our life conditions change. Organisations, nations and civilisations evolve in exactly the same way.

This project offers a new leadership

framework for the next generation of nonprofit professionals. Based on five years of data collected from the New York Community Trust Leadership Fellowship - designed to address leadership development gaps in the nonprofit sector - it constructs three dimensions and eleven themes for the theory and practice of leadership standpoints. Leadership standpoints are a framework for practicing inclusion, building spaces for performance, and thinking and acting with range. Those using leadership standpoints continuously interact with diverse stakeholders, constantly verify others' views and interests, and remain keenly attentive to

power distributions, material constraints, and hidden or unacknowledged voices that need surfaced, while expanding their personal and social outlooks to elevate performance and meet pressing demands best addressed through broadly informed decisions. A landmark book, *Results-Based Leadership* challenges the conventional wisdom surrounding leadership. Authors Ulrich, Zenger, and Smallwood--world-renowned experts in human resources and training--argue that it is not enough to gauge leaders by personal traits such as character, style, and values. Rather, effective leaders know how to connect these leadership attributes with results. Results-

Based Leadership shows executives how to deliver results in four specific areas: results for employees, for the organization, for its customers, and for its investors. The authors provide action-oriented guidelines that readers can follow to develop and hone their own results-based leadership skills. By shifting our focus to the connection between the attributes and the results of leadership, this perceptive new guide fundamentally improves our understanding of effective leadership. *Results-Based Leadership* brings a refreshing clarity and directness to the leadership discussion, providing a hands-on program to help executives succeed

with their leadership challenges.
