he Demag Wheel Range Demag wheels and wheel block systems are engineered as modular solutions for a wide variety of applications and are used in many mobile devices and systems. Favorable dimensions and a wide variety of versatile connection options make our wheel systems particularly cost-effective. The broad range covers wheel loads up to 132,000 lbs (60,000

kg). Review all the performance details and benefits on the product pages. Wheel range | Demagcranes Our wheel range. Our wheels and wheel block systems are designed and manufactured as modular solutions for a wide variety of applications. They are used in countless mobile devices and systems - as single components or as complete travel units. They demonstrate

their high reliability and long service life in operation every day - with only a minimum maintenance requirement. Wheel range | Demagcranes Modular system for tailor-made solutions. Our DRS wheel block system is a versatile travel wheel system and is perfectly integrated into our modular drive system. Eight finely graded sizes with load capacities of up to 40 tonnes per wheel provide

the right wheel block for every application. And the large selection of travel wheels and special wheel designs enable them to be adapted to almost any travel rails and operating conditions. DR S wheel block system | Demagcranes Our wheel range. Our wheels and wheel block systems are designed and manufactured as modular solutions for a wide variety of applications.
