INTERNATIONAL LAW IN NAMIBIA

The Minerva Group, Inc.
Using literacy practices in the newly independent post-apartheid Namibia as a lens through which to examine the effects of globalisation, this broad case study looks at issues surrounding tourism, state control and the new forces of consumerism. By placing literacy at the centre of an investigation into social and cultural change as experienced by individuals, Papen shows that in times of change, reading and writing are always

implicated in structures of power and inequality. The book considers language practices that can exclude some members of Namibian society and also looks at the strategies used by local people to accommodate and even embrace the onward march of global English and the influx of foreign visitors, practices and modes of commerce and interaction.

THE VOLUNTARY GUIDELINES ON THE RESPONSIBLE GOVERNANCE OF TENURE (VGGT) - POPULAR VERSION FOR COMMUNAL LAND ADMINISTRATION

IGI Global
The VGGT Popular Version for Communal Land Administration was developed to

support the Parliament of Namibia in delivering training to traditional authorities and regional institutions to enhance their capacity to administer communal land within their jurisdictions. This was carried out in line with the Communal Land Reform Act, Act 5 of 2002 and the resolutions of the 2nd National Land Conference. The Popular Version outlines 14 pertinent land governance issues in Namibia's communal areas. These issues which were validated by the MAWLR are discussed briefly and followed by identifying key messages of the VGGT that are relevant within the context of communal land administration in Namibia. The working paper is divided into two main parts. The first part is a descriptive analysis of the illicit use of biological agents by criminals and terrorists. It draws on a series of case studies documented in the second part. The case studies describe every instance identifiable in open source materials in which a perpetrator used, acquired, or threatened to use a biological agent. While the inventory of cases is clearly incomplete, it provides an empirical basis for addressing a number of important questions relating to both biocrimes and bioterrorism. This material should enable policymakers concerned with bioterrorism to make more informed decisions. In the course of this project, the

author has researched over 270 alleged cases involving biological agents. This includes all incidents found in open sources that allegedly occurred during the 20th Century. While the list is certainly not complete, it provides the most comprehensive existing unclassified coverage of instances of illicit use of biological agents.

This book is based on the work of the YEEES Research Centre, an international network of scientists from partner universities in Germany, Mozambique, Namibia and South Africa. It presents inter- and transdisciplinary research that explores different ways of understanding resilience, an essential characteristic for systems, organizations and people – providing them with strength in the face of attacks and challenges, and both enabling and fostering constant adaptation and improvement. Building resilience to face today's ever-changing societal and environmental realities requires unbiased research activities that transcend the borders of countries and academic disciplines alike. The research addressed

in this book, thus, is multidisciplinary and includes contributions to areas such as sustainable agriculture, entrepreneurial ecosystems, and smart communities, as well as groundbreaking work on skills development and ICT education.

Highlighting the variety of research activities and their outcomes, this book offers a valuable resource for researchers and practitioners in the fields of sustainable resilience development.

PROPERTY LAW IN NAMIBIA

Martinus Nijhoff Publishers

Property Law in Namibia provides an autochthonous discussion of property law in Namibia. It does not only capture the constitutional, statutory and common law sources of property law in Namibia, but it also covers currently topical subjects such as property rights of women and land reform in Namibia. The publication is meant to be utilised by law academics,

property law lecturers, legal practitioners and conveyancers, law students, students pursuing specialised land related programmes such as land use planning and officials in government ministries. Property Law in Namibia contains chapters on traditional concepts of property law such as the scope and nature of the law of property, classifications of things, real rights and personal rights, ownership and possession. Chapter 9 is devoted entirely to remedies, which is a departure from the norm, but where relevant, appropriate remedies are indicated in the specific parts of the text. In order to give prominence to Namibian property jurisprudence topics on the genesis of the land tenure systems of Namibia, land reform, and property rights of women in Namibia have either been dealt with in separate chapters or been included as parts of other chapters. This publication is meant to be utilised by law academics, property law lecturers, legal practitioners and conveyancers, law students, students pursuing specialised land related programmes such as land use planning and officials

Effective administration of government and governmental organizations is a crucial part of achieving success in those organizations. To develop and implement best practices, policymakers and leaders must first understand the fundamental tenants and recent advances in public administration. Public Affairs and Administration: Concepts, Methodologies, Tools, and Applications explores the concept of governmental management, public policy, and politics at all levels of organizational governance. With chapters on topics ranging from privacy and surveillance to the impact of new media on political participation, this multi-volume reference work is an important resource for policymakers, government officials, and academicians and students of political science.

Labour Law in Namibia is the first comprehensive and scholarly text to analyse labour law in the country, the Labour Act of 2007, and how it affects the

common law principles of employment relations. Concise and extensively researched, it examines the Labour Act in detail in 16 chapters that include the employment relationship; duties of employers and employees; unfair dismissal and other disciplinary actions; the settlement of industrial disputes; and collective bargaining. Over 500 relevant cases are cited, including court rulings in other countries, and comparative references to the labour laws of other Commonwealth countries, notably South Africa, Swaziland, Zambia and the United Kingdom, making it a reference and comparative source book for common law countries in the SADC region and beyond. Written by an authority in the field of labour law, this is a unique reference guide for key players in labour relations, including teachers and students of law, legal researchers and practitioners, human resource and industrial relations practitioners, employers and employers organisations, employees and trade unions, public servants and public policy advisors, and the academic community internationally. In clear and uncomplicated English, the book is accessible to

professional and lay people. A comprehensive list of contents, tables of cases and statues, bibliography and index, assist the reader.

Community-based natural resource management or CBNRM, with its attention to community participation, its call for decentralization of rights to local resource users through democratic and equitable structures, and its potential to deliver benefits to local livelihoods and national conservation interests now forms the predominant strategy for rural development in the communal areas of Namibia. This framework is presumed by the Namibian government and international bodies concerned with conservation and development to deliver measurable and positive economic, environmental, and political results for the State and all of its citizens. CBNRM has taken on particular form and significance for the San in Namibia. Focusing on the experiences of a group of predominantly

San communities in the North-East of Namibia, the historical and contemporary situations of the San of the Nǃa Jaqna Conservancy and their engagement with CBNRM are examined. In looking to the future, this work seeks to understand what mechanisms and institutions give indigenous groups, such as the San, a foothold in the State and an avenue through which to navigate and shape their own modernity(ies). This work explores the modalities through which conservation comes together with interests of indigenous groups and how these groups deploy leverage gained through invoking conservation as discourse and practice. Labour Law in Namibia IGI Global Exploring Economic Reintegration in Namibia: Individual Trajectories of PLAN Ex-Fighters and SWAPO Exiles, 1989–2018 draws from life histories to present constraints and possibilities that have shaped former SWAPO exiles' economic reintegration in post-colonial Namibia from 1989 through 2018. The book advances three arguments, each of which pushes beyond existing scholarship on Namibia and/or economic reintegration broadly. Collectively, these arguments challenge

dominant narratives that have generalized former SWAPO exiles' economic reintegration experiences, highlighting that there is no single narrative that can describe their unique life stories of reintegration in the post-colony.

The field of library and information science is experiencing significant and continued transformation as a result of advancements in digital technology. Adapting to new technologies is crucial for librarians and other information professionals, but there exists a particularly acute gap in technology adoption among developing countries. *Library and Information Science in Developing Countries: Contemporary Issues* explores the relationship between global technology development and the impact of new technologies on library practice, library education, and information science. Book chapters and case studies in this work provide insight to and support for practitioners and executives concerned with the

management of knowledge, information, and organizational development in different types of work environments and learning communities.

Why does Namibia's economy look the way it does today? Was the reliance on raw materials for exports and on the service sector for employment an inevitability? And for what reasons has the manufacturing sector – the vehicle for economic development for many now-high income countries throughout the 19th and 20th centuries – seen its growth held back? With these questions in mind, this book offers an extensive analysis of industrial development and economic change in Namibia since 1900, exploring their causes, trajectory, vicissitudes, context, and politics. Its focus is particularly on the motivations behind the economic decisions of the state, arguing that power relations – both internationally and domestically – have held firm a status quo that has resisted efforts towards profound economic change. This work is the first in-depth economic study covering both the colonial and independence eras

of Namibia's history and provides the first history of the country's manufacturing sector.

The "African Yearbook of International Law" provides an intellectual forum for the systematic analysis and scientific dissection of issues of international law as they apply to Africa, as well as Africa's contribution to the progressive development of international law. It contributes to the promotion, acceptance of and respect for the principles of

international law, as well as to the encouragement of the teaching, study, dissemination and wider appreciations of international law in Africa. A clear articulation of Africa's views on the various aspects of international law based on the present realities of the continent as well as on Africa's civilization, culture, philosophy and history will undoubtedly contribute to a better understanding among nations. The "African Yearbook of International Law" plays an important role in examining the tensions underlying the State in Africa, and by shedding more light on the causes of the fragility of African State institutions so as to facilitate the identification of appropriate remedies. The tension and interrelationships among issues such as territorial integrity, self determination, ethnic diversity and nation-building are constantly addressed. Development, human rights and democratization in Africa are also the subject of continuous attention and examination. The structure of the first two volumes - consisting of a special theme, individual articles, notes and comments, book reviews and basic documents - will be reflected to the extent possible in future volumes, but will also be

constantly improved with the addition of new features and areas of study. The "African Yearbook of International Law" will attract more contributions in the future from African international lawyers currently teaching or practising in Africa. Most of those who have toiled to make the first volume a reality are now working outside the continent. They are, however, all determined to see to it that this intellectual forum will serve first and foremost the teachers and practitioners of international law in Africa.

This book provides readers with the knowledge necessary to fully understand how international law carved the history and life of Namibia. It observes that Namibia has benefited from and contributed to international law in a way that shaped that country's political and socio-economic development and to an extent that few other countries experienced. For many a year since Namibia achieved Independence on 21 March 1990 and established the Faculty of Law at the University of Namibia in 1992,

students and lecturers have relied on materials from South Africa, despite the fact that Namibian law has since then grown apart from its South African heritage. It is high time for lecturers and students in Namibia to teach and learn with a textbook that analyses international law from the distinct standpoint of Namibia and that views the nation's legal interactions with other states through its own prism! And this textbook aims to do just that. Through its 19 chapters, this book informs readers about international law, its sources, international treaties, Namibian statehood, dispute resolution, the use of force, human rights, Namibia's economic relations with the outside world (including the Southern African Customs Union), and the law of the sea. Namibian courts have in their own way followed the rules of international law scrupulously, but - as this book shows - international law nonetheless remains the source of Namibian law that lawyers apply the least. Accordingly, this book underlines the significance, the practical utility, and the relevance of international law in the unique Namibian context. "Land is Life, Conservancy is Life." BASLER
