THE INTERNET OF US: KNOWING MORE AND UNDERSTANDING LESS IN THE AGE OF BIG DATA

Portage & Main Press

This exciting student textbook presents a contemporary global look at human geography. The *World Today: Its People and Places* connects your students to different cultures and geographical areas and helps them develop a sense of global

awareness and responsible citizenship. This engaging textbook includes unique and interesting features designed to help your students become geographically literate. Explore the world with your students using: hundreds of illustrations and stunning photographs of people and places; detailed maps, charts, and graphs; quotations from contemporary international and Canadian public figures; hundreds of glossary terms conveniently highlighted in the text; guiding questions; concluding and summary comments; special-interest icons that appear throughout the textbook; guide your students to further learning adventures, discussion topics, media investigations, opportunities for developing social studies skills, informative Internet sites, and much more. Recommended by Manitoba Education, Citizenship and Youth as a Manitoba grade 7 social studies learning resource.

Something New Under the Sun: An Environmental History of the Twentieth-Century World (The Global Century Series) W. W.

Norton & Company

In this age of intense political conflict, we sense objective fact is growing less important. Experts are attacked as partisan, statistics and scientific findings are decried as propaganda, and public debate devolves into personal assaults. How did we get here, and what can we do about it? In this sweeping and provocative work, political economist William Davies draws on a four-hundred-year history of ideas to reframe our understanding of the contemporary world. He argues that global trends decades and even centuries in the making have reduced a world of logic and fact into one driven by emotions—particularly fear and anxiety. This has ushered in an age of “nervous states,” both in our individual bodies and our body politic. Eloquently tracing the history of accounting, statistics, science, and

human anatomy from the Enlightenment to the present, Davies shows how we invented expertise in the seventeenth century to calm the violent disputes—over God and the nature of reality—that ravaged Europe. By separating truth from emotion, scientific, testable facts paved a way out of constant warfare and established a basis for consensus, which became the bedrock of modern politics, business, and democracy. Informed by research on psychology and economics, Davies reveals how widespread feelings of fear, vulnerability, physical and psychological pain, and growing inequality reshaped our politics, upending these centuries-old ideals of how we understand the world and organize society. Yet Davies suggests that the rise of emotion may open new possibilities for confronting humanity's greatest challenges. Ambitious and compelling, *Nervous States* is a perceptive and enduring account of our turbulent times.

Human Geography W. W. Norton & Company Examines the cultural geography of Tejano

South Texas and the Mexican ancestry of its residents, discussing where they originated, when they came to Texas, and how the area differs from other Mexican American regions.

THE 9/11 COMMISSION REPORT

Routledge
An award-winning professor of economics at MIT and a Harvard University political scientist and economist evaluate the reasons that some nations are poor while others succeed, outlining provocative perspectives that support theories about the importance of institutions.

NERVOUS STATES: DEMOCRACY AND THE DECLINE OF REASON

National Center for Constitutional Studies
"An intelligent book that struggles honestly with important questions: Is the net turning us into passive knowers? Is it degrading our ability to reason? What can we do about this?" —David Weinberger, Los Angeles Review of Books
We used to say "seeing is believing"; now, googling is believing. With 24/7 access to nearly all of the world's information at our

fingertips, we no longer trek to the library or the encyclopedia shelf in search of answers. We just open our browsers, type in a few keywords and wait for the information to come to us. Now firmly established as a pioneering work of modern philosophy, *The Internet of Us* has helped revolutionize our understanding of what it means to be human in the digital age. Indeed, demonstrating that knowledge based on reason plays an essential role in society and that there is more to "knowing" than just acquiring information, leading philosopher Michael P. Lynch shows how our digital way of life makes us value some ways of processing information over others, and thus risks distorting the greatest traits of mankind. Charting a path from Plato's cave to Google Glass, the result is a necessary guide on how to navigate the philosophical quagmire that is the "Internet of Things."

Memory, History, Race, and the American Landscape W. W. Norton & Company
MyEducationKit is an online solution that provides dynamic

resources designed to connect your textbook to real teaching situations. It is fully integrated with your textbook; wherever you see the MyEducationKit logo in the margins or elsewhere in the text, follow the simple instructions to access videos, cases, artifacts, and web links associated with the content covered in your text. The eighth edition of *Through the Eyes of a Child: An Introduction to Children's Literature* builds on all the most valuable technology from previous editions, pulling everything together in one, dynamic new website---MyEducationKit at www.myeducationkit.com. [Maps and Graphics That Will Change How You See the World](#) University of Texas Press

Sociology for Music Teachers: Practical Applications, Second Edition, outlines the basic concepts relevant to understanding music teaching and learning from a sociological perspective. It demonstrates the relationship of music to education, schooling and society, and examines the consequences for making instructional choices in teaching methods and

repertoire selection. The authors look at major theories, and concepts relevant to music education, texts in the sociology of music, and thoughts of selected ethnomusicologists and sociologists. The new edition takes a more global approach than was the case in the first edition and includes the application of sociological theory to contexts beyond the classroom. The *Second Edition: Presents major theories in ethnomusicology, both traditional and contemporary. Takes a global approach by presenting a variety of teaching practices beyond those found in the United States. Emphasizes music education in a traditional classroom setting, but also applies specific constructs to studio teaching situations in conservatories (with private lessons) and community music. Provides recommendations for teaching practices by addressing popular music in school music curricula, suggests inclusionary projects that explore musical styles and repertoire of the past and present, and connects school to community music practices of varying*

kinds. Contains an increased number of suggestions for projects and discussions among the students using the book.

Final Report of the National Commission on Terrorist Attacks Upon the United States

Human Geography
An entertaining and informative voyage through cultural fantasies of the North, from sea monsters and a mountain-sized magnet to racist mythmaking. Scholars and laymen alike have long projected their fantasies onto the great expanse of the global North, whether it be as a frozen no-man's-land, an icy realm of marauding Vikings, or an unspoiled cradle of prehistoric human life. Bernd Brunner reconstructs the encounters of adventurers, colonists, and indigenous communities that led to the creation of a northern "cabinet of wonders" and imbued Scandinavia, Iceland, and the Arctic with a perennial mystique. Like the mythological sagas that inspired everyone from Wagner to Tolkien, *Extreme North* explores both the dramatic vistas of the Scandinavian fjords and the murky depths of a

Western psyche obsessed with Nordic whiteness. In concise but thoroughly researched chapters, Brunner highlights the cultural and political fictions at play from the first “discoveries” of northern landscapes and stories, to the eugenicist elevation of the “Nordic” phenotype (which in turn influenced America’s limits on immigration), to the idealization of Scandinavian social democracy as a post-racial utopia. Brunner traces how crackpot Nazi philosophies that tied the “Aryan race” to the upper latitudes have influenced modern pseudoscientific fantasies of racial and cultural superiority the world over. The North, Brunner argues, was as much invented as discovered. Full of glittering details embedded in vivid storytelling, *Extreme North* is a fascinating romp through both actual encounters and popular imaginings, and a disturbing reminder of the power of fantasy to shape the world we live in. [A Global Compendium of Diaspora Missiology](#) W. W. Norton & Company It has, improbably, been called uncommonly lucid, even riveting by *The New York Times*, and it was a

finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is *The 9/11 Commission Report*, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States—which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean—it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts—it has been criticized for failing to include

testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7—it is nevertheless an essential record of one of the most transformational events of modern times.

Floating Coast: An Environmental History of the Bering Strait e-arknow

An unprecedented portrait of the hidden patterns in human society—visualized through the world of data. National Academies Press A brutally frank memoir about doctors and patients in a health care system that puts the poor at risk. *No Apparent Distress* begins with a mistake made by a white medical student that may have hastened the death of a working-class black man who sought care in a student-run clinic. Haunted by this error, the author—herself from a working-class background—delves into the stories and politics of a medical training system in which students learn on the bodies of the poor. Part confession, part family history, *No Apparent Distress* is at once an indictment of American health care and a deeply moving tale of one doctor’s coming-of-age.

Its People and Places

Langham Global Library
 "Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, *New York Review of Books*) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war -- and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal. *Pathways to Health Equity* Currency
 Cultural Geography is a core text suitable for use in second- and third-year cultural geography

courses offered out of geography departments at select universities across the country.

EXTREME NORTH: A CULTURAL HISTORY

W. W. Norton & Company Shows how individuals are affected by, and respond to, economic, social, and political forces at all levels of scale: global, regional and local. It offers an inclusive picture of people in a globalizing world - men, women, children, both mainstream and marginalized citizens - not as seen from a western perspective, but as they see themselves. Core topics of physical, economic, cultural, and political geography are examined from a contemporary perspective, based on authoritative insights from recent geographic theory and examples from countries from around the world.

Uncommon Ground: Rethinking the Human Place in Nature W. W. Norton & Company The inspiration for Chloé Zhao's 2020 Golden Lion award-winning film starring Frances McDormand. "People who thought the 2008 financial collapse was over a long time ago need to meet the people Jessica Bruder

got to know in this scorching, beautifully written, vivid, disturbing (and occasionally wryly funny) book." —Rebecca Solnit From the beet fields of North Dakota to the campgrounds of California to Amazon's CamperForce program in Texas, employers have discovered a new, low-cost labor pool, made up largely of transient older adults. These invisible casualties of the Great Recession have taken to the road by the tens of thousands in RVs and modified vans, forming a growing community of nomads. *Nomadland* tells a revelatory tale of the dark underbelly of the American economy—one which foreshadows the precarious future that may await many more of us. At the same time, it celebrates the exceptional resilience and creativity of these Americans who have given up ordinary rootedness to survive, but have not given up hope.

Atlas of the Invisible

University of Toronto Press
 Assesses the impact of humanity on twentieth century Earth, exploring the indirect effects of politics, international relations, technological change, key scientists, and environmental

disasters and policies.

[Birth of a Nation](#) Liveright Publishing

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health.

Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty,

unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. **Communities in Action: Pathways to Health Equity**

seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Communities in Action
OUP Canada

In this book, Hayhoe paints a picture of a surprisingly mobile and dynamic Burgundian rural population.
