CONTEMPORARY MANAGEMENT

Irwin Professional Publishing

In Organizational Behavior: Solutions for Management, Paul Sweeney and Dean McFarlin have identified 4 key management skills areas that act as building blocks for successful behavior in management. These skills are: self-insight/perceptual skills; ability to inspire/motivate/lead; ability to analyze situations; and personal flexibility/adaptability. The authors also feel strongly that successful management of organizational behavior rests on the problem-solving process; in fact, the 4 skills listed above enable managers to use this process to deal with the "people problems" they face more effectively. If nothing else, studying what organizational behavior has to offer as a field should help a person figure out his/her strengths and weaknesses.

A Practical, Problem-Solving Approach McGraw-Hill/Irwin "Organizational behavior is the study of individual and group dynamics within an organization setting (micro level of analysis), whereas, organization theory is the study of the organization as a whole (macro level of analysis). In other words, organizational behavior is the psychology of organizations and organizational theory is the sociology of organizations (Daft, 2004)"--

The Seventh Edition of Canadian Organizational Behaviour is truly a "new and improved" McShane: new trim size, fresh new design, new co-author, reorganized table of contents, improved examples, and even enhanced readability. The McShane brand is known for its cutting edge research and scholarship, recognized for its "for Canadians, by Canadians" approach to content, and respected for its firm anchoring of Canadian material within a global context. No other OB book offers the kind of comprehensive coverage in such an accessible, readable format. Canadian Organizational Behaviour continues to lead the way as the most innovative OB text on the market. McShane was the first OB textbook to include topics such as workplace emotions, appreciative inquiry, social identity theory, future search events, virtual teams, workaholism, and emotional intelligence. The innovation continues in the seventh edition with new and expanded coverage of topics such as employee engagement, resilience, four-drive theory, blogs and wikis, psychological harassment, learning orientation, Schwartz's values model, and separating socioemotional from constructive conflict. The pedagogical features have been completely overhauled to speak to new and emerging topics in OB worldwide, including the opening vignettes, the photo essays in each chapter, and many of the end-of-chapter exercises and end-of-part cases.

BEHAVIOR IN ORGANIZATIONS, 9/e, by Shani and Lau, is a paperback text that takes a hands-on, experiential approach (learning-by-doing or learning-in-action) to organizational behavior. The majority of the exercises, role-playing simulations, and cases were developed in and for management training workshops. The cases themselves represent different industries and organizations around the globe with diverse size, product,

service, and cultures. Instructors appreciate the multiple interactive teaching methods for each teaching module. Experiential methods provide a powerful stimulus for learning, growth, and change by helping participants focus on their own behaviors and reactions as data. The text begins with structured, less personal exercises that are readily recognized as relevant to human effectiveness in organizational settings. Personal growth and self-understanding activities are introduced later in the text, after students have had enough experience to become more comfortable and ready for them. The ninth edition of this book, like the previous editions, is designed to meet needs that other texts do not satisfy.

Principles of Management Jones & Bartlett Publishers Lussier's: Human Relations in Organizations: Applications and Skill Building, 6e takes an application/skill building approach to human relations. This approach suits professors, who want to incorporate more activities and exercises into the classroom, and students who want to be able to do more than just understand concepts, but actually apply and develop skills that they can use in their daily and professional life. The book continues to have integration balanced by a three-pronged approach:--clear concise understanding of human relations/ organizational behavior concepts;--the application of HR/OB concepts for critical thinking in the business world; and--the development of HR/OB skills. This approach allows the student to learn the concept, apply it through various applications and situational activities, and ultimately apply it to his/her own life.

This book is an extension of the authors one topic of PhD research i.e. motivation theories and its application to the teaching profession. It can give readers dual benefit of theoretical knowledge of motivation and existing theories of motivation in detail. This is an attempt to put all the theories in one book. Plus an analysis of these theories has also been made relating to its application to the teaching profession in colleges in India. The comments are given based on the study of elaborate literature review of various articles and books written by eminent educationists on the state of college education. At the end of book the author has suggested her own theory in order to motivate teachers.

ESSENTIALS OF CONTEMPORARY MANAGEMENT

McGraw-Hill/Irwin

A first-of-its-kind, this book proposes a marketing plan for the police, using the conventional framework of marketing management. While there is considerable discussion and criticism of the way the police force functions in India, no comprehensive alternative model has been proposed to implement the New Police Management (NPM) approach in the force's operations. In fact, the necessity for overhauling the police system is strongly felt all over the world in the light of the recent international security lapses. The framework that this book suggests comprises current situation analysis, SWOT analysis, STP analysis and the 8 Ps. Policing: Reinvention Strategies in a Marketing Framework combines marketing principles with the empirical knowledge of police operations to suggest improvements in the Indian police force. It uses the marketing motto of 'keeping the customer at the

centre' as key to finding solutions to the issues that the police face in their everyday operations. In addition, it carries case studies related to police operations from across the world and suggests ways of adapting the strategies used in these to the Indian context. In doing so, the book offers valuable inputs for police academies, public administration, public policy, and state security commissions, as it not only analyses the current situation in the police force, but also draws a clear and practicable roadmap to revamp it.

Organizational Behavior 8E (Sie) Tata McGraw-Hill Education Jones and George are dedicated to the challenge of "Making It Real" for students. As a team, they are uniquely qualified to write about the organizational challenges facing today's managers. No other author team in the management discipline matches their combined research and text-writing experience. Essentials of Management concisely surveys current management theories and research. Through a variety of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs, "unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a career.
