“The Joy Luck Club is one of my favorite books. From the moment I first started reading it, I knew it was going to be incredible. For me, it was one of those once-in-a-lifetime reading experiences that you cherish forever. It inspired me as a writer and still remains hugely inspirational.” —Kevin Kwan, author of *Crazy Rich Asians* Amy Tan’s beloved, New York Times bestselling tale of mothers and daughters, now the focus of a new documentary Amy Tan: Unintended Memoir on Netflix Four mothers, four daughters, four families whose histories shift with the four winds depending on who’s “saying” the stories. In 1949 four Chinese women, recent immigrants to San Francisco, begin meeting to eat dim sum, play mahjong, and talk. United in shared unspeakable loss and hope, they call themselves the Joy Luck Club. Rather than sink into tragedy, they choose to gather to raise their spirits and money. “To despair was to wish back for something already lost. Or to prolong what was already unbearable.” Forty years later the stories and history continue. With wit and sensitivity, Amy Tan examines the sometimes painful, often tender, and always deep connection between mothers and daughters. As each woman reveals her secrets, trying to unravel the truth about her life, the strings become more tangled, more entwined. Mothers boast or despair over daughters, and daughters roll their eyes even as they feel the inextricable tightening of their matriarchal ties. Tan is an astute storyteller, enticing readers to immerse themselves into these lives of complexity and mystery.

When teaching children to read, color coding the alphabet can help them learn the different kinds of letters in the English language. Color coding also helps highlight common letter combinations, such as consonant blends, and shows how these combinations create a variety of consonant and vowel sounds. As a result, children learn to recognize letter and sound patterns, helping the reading process become more intuitive. This approach is often used in Montessori teachings. For example: Red: Consonants (b, c, d, f, g, h, j, k, l, m, n, p, q, r, s, t, v, w, x, y, z) and Consonant Blends (bl, br, cl, cr, dr, fr, tr, fl, gl, gr, ld, nd, nk, pl, pr, sk, sl, sm, sn, sp, st) Blue: Short Vowels (a, e, i, o, u) Green: H-Digraphs (sh, th, ch), Long Vowels (a, e, i, o, u), Silent e (e) and Spelling

Patterns (ck, ff, ll, ss, ay, ee, ow, oo, ou, ow, er, or, ar, ing). Once the red consonants and blue short vowels are mastered, the remaining spelling variations are noted in green to distinguish that these sounds are different than the recognizable consonants or short vowels. The series is taught in a specific order to develop familiarity: Short a Short i Short a and i Short o Short a, i, o Short u Short a, i, o, u Short e Short a, i, o, u, e Consonant Blends H-Digraphs Silent e / Long Vowels Consonant Phonogram Spelling Patterns ck, ff, ll, ss Vowel Phonogram Spelling Patterns ay, ee, ow, y, oo, ou, ow, er, or, ar. BONUS: Short Vowels and Silent e Comparisons. Written by a mom and edited by a Montessori Director.

This is an experimental phonetic investigation into the vowel duration system of Civili, an indigenous language spoken in Gabon and some of its neighboring countries. Apart from providing insight into how mother-tongue speakers articulate and perceive certain vowels, it contributes significantly to the establishment of a credible orthography for this language. Speech data acquired through extensive fieldwork were analyzed acoustically to determine sound qualities, after which perception tests were administered to determine how listeners perceive vowel sounds in different environments. The findings are of significance for linguistic descriptions per se, as well as for eventual use in the field of human language technologies. This seven-chapter book is mainly intended for an expert readership and for students of phonetics and phonology.

### READING BOOK 1

Independently Published

Intended for student use at home as a supplement to schoolwork or at school as a phonics text, this workbook presents the most common and regular sounds of vowels. The short vowels are presented first. The lesson for each vowel consists of six pages of exercises. On the first page, the vowel sound is introduced by a cartoon. On the second and third pages, students learn to recognize the short vowel sounds by saying the names of pictures and completing short vowel words. The remaining three pages of the lesson provide practice in using the vowel sound in context. The second half of the workbook deals with long vowel sounds, which are presented in the same manner as the short vowel sounds, except that the different spellings for each of the vowel sounds are treated individually to aid in the students' recognition of the long vowels. There are three reviews in the workbook: one for the short vowels, one for the long vowels, and a general review. (MG)

What are Short Vowel Workbooks? These workbooks help emerging readers decode (read) words using a phonics-based approach ("sounding out" words). In addition, the matching activities in these worksheets help children build their vocabulary while understanding the meaning of each word. So these workbooks help a child learn to read, comprehend and build vocabulary. They are unique because all the words in these workbooks only use short vowel sounds. What is a Short Vowel? All vowels have long sounds and short sounds. Emerging readers often get confused when

presented with words that have different vowel sounds. This is why all the words in these sheets use ONLY short vowels. This makes it easy for a child to sound the words out, a skill essential for emergent readers. Students do NOT need to know long vowel sounds to use these worksheets. How do the levels progress in these workbooks? There are five sequenced workbooks, each consisting of 12 worksheets (except for the first workbook which has 13). Each workbook progresses to the next level with increasing difficulty, so only move the child up when ready. If more practice is required, have the student repeat a workbook or worksheet as needed before going up to the next level. If you have purchased the digital workbook, you may take unlimited printouts of the worksheets. Why these specific words and pictures? The workbooks have been created after studying the patterns of errors children make while reading. There is a reason behind the combinations of words and pictures. Sometimes, the word choices in each row begin with the same letter sound. Sometimes the letters are reversed (lap, pal), and sometimes the word choices all rhyme (dad, had, sad). These force the child to read the entire word, and not just guess the answer, based on memory or the shape of the word.

Teaching Children All about Vowels (Reading Book 1) can be used to teach students the short and long vowel sounds, the four sounds of y (three of which are vowel sounds), the r-controlled vowels, vowel digraphs, and diphthongs. In addition, children will be taught the three common ways of identifying a long vowel sound (i.e., vowel sounds changed by a final e as in "ride," double vowel patterns as in "coat," and CV and CCV words as in "he" and "she"). Students will even learn how to mark any short vowel sounds heard in words with the symbols ?, ?, ?, and ?; letters that make the schwa sound with the symbol ?; and letters that make a long vowel sound with the symbols ?, ?, ?, ? and ?. Please note that Habakkuk Educational Materials also offers a similar book to teach students about consonants titled Teaching Children All about Consonants (Reading Book 2). Most topics are introduced with one or more colorful pages having examples of the vowel sound (such as r-controlled vowels, vowel digraphs, or diphthongs), as well as any definitions or rules that are associated with it. The colorful introduction pages are followed by reproducible worksheets that serve to reinforce the rules from the introduction pages. Some of the worksheets were designed to be used by the teacher for direct instruction purposes on the classroom screen, while others can be used for individual practice and to assess student learning. Keys to many of the worksheets and to the practice test are provided at the end of the book. The practice test is reproducible and is also available online as a computer-based test. You can access the test free of charge by visiting the website of Habakkuk Educational Materials at <https://www.habakkuk.net/>. The computer will notify users if an answer is correct or incorrect, and their grades will be displayed after completing a test. When the student feels confident or at the teacher's discretion, there is also a computer-based unit test they can take to test their comprehension over the book's content.

Learn to Read for Kids 5-7 uses phonics by focusing on one vowel sound at a time. Each book is written in mostly one vowel sound, making decodable words possible and more palatable. This book focuses on long vowel sounds. This concept was formulated after extensive research at UCLA and works for young children struggling to read, people with special-needs overwhelmed with many vowel sounds all at once and even helps children learn to speak while enabling the brain to focus on one vowel sound until it masters that sound and can move onto the next vowel sound. Learning to read can be very difficult for children. It is important that the steps are small enough to ensure success. Many early reading children's books immediately cover all short and long vowel sounds together, which is very confusing for first time readers. Through my research, I have found that it is very important to introduce the vowel sounds one at a time. Since there are so many first time reading books that blend too many words with too many vowel sounds together this can be frustrating for children and sometimes makes them want to shut down and give up. Therefore, I created these books so that children can build their confidence when reading. Each book focuses on a particular vowel sound and starts out with simple words for success. First, practice the focus words with your child that are in each book. Next, each book is meant to be read by the parent to the child, then together, and eventually let the child try on their own. When reading the books, point to each word and each sound as you read it. Then, work on blending the sounds as you point to each sound with the child. Continue practicing the focus words in each book

and reading to and with your child. Since each book focuses on one vowel sound, it helps them to succeed in building their reading skills by working on one book and therefore one vowel sound at a time. As your child builds confidence in one book, they can move to the next. Happy reading!
