CompTIA PenTest+ is a certification for cybersecurity professionals tasked with penetration testing and vulnerability assessment and management. CompTIA PenTest+ is an intermediate-skills level cybersecurity certification that focuses on offensive skills through pen testing and vulnerability assessment. Cybersecurity professionals with CompTIA PenTest+ know how plan, scope, and manage weaknesses, not just exploit them.

CompTIA PenTest+ is compliant with ISO 17024 standards and approved by the US DoD to meet directive 8140/8570.01-M requirements. Regulators and government rely on ANSI accreditation, because it provides confidence and trust in the outputs of an accredited program.

CompTIA Server+ is a global certification that validates the hands-on skills of IT professionals who install, manage and troubleshoot servers in data centers as well as on-premise and hybrid

environments. CompTIA Server+ is the only certification that can ensure that IT professionals at the administrator level are able to do the job in any environment because it is the only certification not restricted to a single platform. The exam covers essential hardware and software technologies of on-premise and hybrid server environments including high availability, cloud computing and scripting. The new exam includes performance-based questions that require the candidate to demonstrate multi-step knowledge to securely deploy, administer and troubleshoot servers. CompTIA Server+ now features flexible training options including self-paced learning, live online training, custom training and labs to advance the career development of IT professionals in server administration.
