In this wide-ranging, illustrated survey, Nicholas Dromgoole traces the origins and evolution of this lost 'language of gesture' from ancient Greece to the contemporary stage, and asks what it would actually have been like to watch the great plays - and the great actors - of western theatre in their own day.

This book, first published in 1929, analyses the changes to Birmingham and the Black Country in the nineteenth century. The area underwent quite a transformation: many of the older trades were decaying, while at the same time a number of new manufactures were making a remarkable rapid advance. As a result of this, the industrial structure of the area in the early twentieth century was made up of very different constituents from those of which it was composed sixty years previously. This is an invaluable study of a remarkable industrial transformation that was carried out in a very short space of time.
