"Aristotle classified the things in the world into ten categories: substance, quantity, quality, relation, etcetera. Plotinus, the founder of Neoplatonism, attacked the classification, accepting only the first four categories, rejecting the other six, and adding one of his own: change. He preferred Plato's classification into five kinds, including change. In this part of his commentary, Simplicius records the controversy on the six categories rejected by Plotinus: acting, being acted upon, being in a position, when,

where, and having on. Plotinus' pupil and editor, Porphyry, defended all six categories as applicable to the physical world, even if not to the world of Platonic Forms to which Platonist studies must eventually progress. Porphyry's pupil, Iamblichus, went further: taken in a suitable sense, Aristotle's categories apply also to the world of Forms, although they require Pythagorean reinterpretation. Simplicius may be closer to Porphyry than to Iamblichus, and indeed Porphyry's defense established Aristotle's categories once and for all in Western thought. But the controversy of this period nonetheless revealed more effectively than any modern discussion the profound difficulties in Aristotle's categorial scheme."--Jacket.

A lot has been written about the time contractor Raymond Davis spent in a Pakistani jail in 2011. Unfortunately, much of it is misleading—or downright false—information. Now, the man at the center of the controversy tells his side of the story for the very first time. In *The Contractor: How I Landed in a Pakistani Prison and Ignited a Diplomatic Crisis*, Davis offers an up-close and personal look at the 2011 incident in Lahore, Pakistan, that led to his imprisonment and the events that took place as diplomats on both sides of the bargaining table scrambled to get him out. How did a routine drive turn into front-page news? Davis dissects the incident before taking readers on the same journey he endured while trapped in the Kafkaesque Pakistani legal system. As a veteran security contractor, Davis had come to terms with the prospect of dying long before the January 27, 2011 shooting, but nothing could prepare him for being a political pawn in a game with the highest stakes imaginable. An eye-

opening memoir, *The Contractor* takes the veil off Raymond Davis's story and offers a sober reflection on the true cost of the War on Terror.
